Ref.C. *No.*532/40 A5, *dated* 8th February 1940.

Sir,

Assessment - Land Revenue - Bellary District and Taluk certain villages - postponement of February kist to March 1940 - report submitted.

Ref:- This office Pr.84/40 dated 31-1-1940.

Several petitions were received from the villages of(1.Kuditani, 2. Siddammanahalli 3. Janikunta 4. Haraganadona 5. Kappagal; 6. Kolagal; 7.Sidiginamola; 8. Meenahalli)in Bellary taluk requesting remission of land revenue on account of the sudden failure of crops. The Revenue Divisional Officer Bellary, to whom the petitions were referred, has submitted an interim report requesting postponement of the February Kist in parts of Bellary taluk to March 1940.

2. Crop history.

The Revenue Divisional Officer Bellary reports that he has made an extensive tour in Kurugodu and Rupanagudi firkas and found that the condition of crops is really bad and that the mungari and hingari crops have not fared well on account of paucity of rain in some months, of excess of rains in October, and also of agricultural pests. He reports that the crops were promising till the middle of December 1939 and that there was a sudden deterioration in their condition

and that most of the standing crops are now drooping and are not likely to yield more than 4 annas out-turn and that there is a case for suspension of land revenue in some parts of the Bellary taluk.

3). Rain-fall.

The rain-fall received during 1938 & 1939 at Bellary and Kurugodu stations is enclosed. The crops were fair in the initial stages owing to the adequate rain-fall.

4) Sri. B. Bhima Rao M.L.C., Sri.H. Sitarama Reddi,M.L.A., Dr. R. Nagana Gouda, President District Board and other ryots waited in deputation on me on 7-2-40 and represented that sudden unfavourable winds and want of dew combined with agricultural pests have caused a sudden deterioration of the standing crops in the last week of December 1939 and requested that the collection of the first kist may be post-poned to March 1940.

Pending the receipt of detailed reports from the Revenue Divisional Officer, Bellary, I have ordered the postponement of collection of the first kist from February 1940 to March 1940 in all the 21 villages of Kurugodu firka, eleven villages in Kolur firka and eight villages in Rupangudi firka under B.S.O. 14, paragraph 3 in anticipation of the sanction of the Board. I request that my action may be approved. A copy of the proceedings is enclosed.

Proceedings of the Collector of Bellary.

A.D.Crombie Esq., C.IE., I.C.S.,

No. 532/40 dated 8-2-1940.

Assessment - Land Revenue - Bellary district and taluk - certain villages - postponement of February kist to March 1940 - orders passed.

Read: Bellary Revenue Divisional Officer's C. No. 205/40 B dated 30-1-40 and 31-1-40.
Petition from the Deputationists of Bellary taluk dated 7-2-1940.

O r d e r.

As represented by the deputationists Sri B. Bhima Rao,ML.C. Sri H. Sitarama Reddi, M.L.A.,, Dr. R. Nagana Gowd and others and as recommended by the Revenue Divisional Officer, Bellary, the postponement of the collection of February kist to March 1940 in all the 21 villages of Kurugodu firka, eleven villages in Kolur firka and 8 villages in Rupanagudi firka noted in the annexure is ordered under B.S.O. 14 paragraph 3. The fact of postponement should be widely published in all the villages concerned, by beat of tom-tom.

2. It is seen that there is only a failure of crops in parts of Bellary taluk and as such the distress will be treated as "local calamity" falling under B.S.O. 14.

3. To decide whether there is a case for suspension of land revenue and if so, in what proportion, the following statistics and other particulars should be submitted expeditiously.

i. outturn statements and the full information as required by B.S.O. 14-A-I (2).

ii. a plan showing the affected villages and tracts.

iii. a report regarding the thorough inspection of crops in the affected areas as required by B.S.O. 14(1).

Proposals for suspension or remission of revenue should show distinctly the extent to which they are based on the personal inspection of Superior Officers.

For Collector.

Sir,

Assessment -Land Revenue -Fasli 1349 -Bellary District and taluk - February kist postponement to March 1940 - Number of villages 40 -

ENCLOSURES

pp 1-2 cf

Ref. This office C.No. 532/40 A.5 dated 8.2.40.

SPARE COPIES 1 cf.

Board's Ref.S.No. 1343/40.1.dated 14.2.40.

In the Board's Reference cited above, the Board has sanctioned the postponement of the collection of the February kist to March 1940 in 36 villages only, but according to my reference C.No. 532/40 A.5. dated 8.2.40 I have ordered the ~~post~~ postponement of collection in 40 villages as detailed below

pp 1-2 cf

1.	Kurugodu firka	21 villages including two shrotriem villages
2.	Koldur firka	11 villages including one shrotriem village
3	Rupanagudi Firka	8 villages
		40

* This was mistaken as 7 being and hence the error as given in the letter

The Government lands in the shrotirem villages are also eligible for remission or postponement. Kind attention is invited to B.P.Mis.No. 2139 dated 4.8.38 wherein the Government sanctioned a remission of 12 annas in the rupee in respect of government lands in the two shrotriem villages in Hospet taluk, owing to adverse seasonal conditions in Fasli 1347. I request

E

request that sanction may be accorded for the postponement of collection of the February Kist to 40 in the remaining four more villages

Assessment - Land Revenue - Bellary district and taluk - certain villages - postponement of February kist to March 1940.

Ref: 1. This office P.R. 84/40 dated 31-1-1940 and C. No. 532/40 A-5 dated 8-2-1940.

The Revenue Divisional Officer, Bellary, has requested time till 20-2-1940 for the submission of his detailed report and the outturn statements, as this a subject requiring a careful study of the seasonal conditions and a close scrutiny of the outturn statements. I hope to submit my report by the 25th February 1940. I request that time may be granted till 25-2-1940 for the submission of the report.

Assessment - Land Revenue - Fasli 1349 -Bellary district and taluk - 42 villages remission proposals - submitted.

Ref: (1) This office C. No. 532/40-A-5 dated 8-2-1940 and 14-2-1940.

(2) Board's Ref. No. No. 1343/40-1 dated 14-2-1940.

I submit my further report in detail on the seasonal conditions under various heads:-

Statt at p3 Cf

2. Rainfall. The main feature of the present season is the belated and inadequate rainfall during June and July (1939) when sowings are generally commenced on an extensive scale. There are only two rain recording stations Kurugodu and Bellary - in Bellary taluk. The tract affected is the Kurugodu firka and the bordering villages of Kolur and Bellary firkas and eight villages of Kupanagudi firka. In all 42 villages are affected. A comparative statement showing the particulars of rainfall recorded both at Bellary and Kurugodu stations in 1938 and 1939 was already furnished to the Board, from which it is seen that there was no rainfall at all in the months of April and May 1939 and that there were only 0.10" and 0.82" of rain in June and July 1939 which is usually the sowing season for 'mungari crops As the rainfall in these months was very little, the sowing operations were retarded and they could not be completed

Map at (H)

p2 Cf

K Kurugodu

till

till the middle of August 1939. The mungari sowings were thus belated. Cessation of rain from the middle of August 1939 to the middle of September 1939, just at a time when the tender crops needed rain most, further affected the late sowings. Though the excessive rainfall in October 1939 resuscitated the crops it did not improve their condition sufficiently.

3. Crop history. The standing crops - mungari cotton, hingari cotton, white cholam and korra - were affected by a blight commonly termd as "Katiki" locally. Mungari cotton is stunted in growth and the lower leaves have withered away. Hingari cotton, Korra and white cholam have also been affected by this blight. September is the normal season for the 'hingari' sowings. As there was no rainfall for about one month followed by an excessive rainfall in October, the hingari shwings were deferred till November 1939. The hingari crops looked promising till the middle of December 1939, but unfavourable dry winds and want of dew combined with agricultural pests have caused a sudden deterioration of the standing crops in the last week of December 1939. The taluk was affected intermittently. Relief was granted by way of either suspension or remission in previous faslis - 1336, 1338, 1340, 1341, 1344, 1346 and 1347. Fasli 1348 was a normal year which yielded a good harvest. Loans instalments were therefore ordered to be collected.

4. Irrigation sources. There are no irrigation sources worth the name in the Bellary taluk except the five Hagari Spring Channels and two other vanka channels. There are very few wells in the taluk, especially in the affected tracts. The well irrigation is also extremely limited. The villages in Bellary taluk, particularly the affected tracts, are mainly rain fed.

5. Trend of prices. A comparative statement showing

showing the trend of prices of food stuffs for 1938 and 1939 is enclosed. The price of food stuffs is steady now. With the commencement of the war, there was a general inflation in the prices of food stuffs and other commodities. This was due to the merchants witholding stock on a speculative basis. Now with the arrival of fresh stocks after the harvest, the prices of food grains are normal. There will be no dearth of food grains as the harvest in other parts of the district has been good.

6. Outturn statements. These have been prepared in accordance with B.P. Mis. 3185 dated 9-10-1938, B.P. No. 501 dated 20-2-1939 and B.P. Mis. 1699 dated 20-6-1939. The villages have been arranged under two groups - A and B. List A contains villages with an outturn of 4.5 annas and below. List B contains villages with an average outturn of 4.6 to 6 annas. The Revenue Divisional Officer, Bellary has not recommended the grant of remission in respect of two villages Shrotriem Somalapur and Shrotriem Bhatrahalli otherwise known as Lakshmipuram, as the mungari crops in these red soil villages have fared better than the adjoining affected villages. Hence these two villages in respect of which postponement of collection of the first kist was ordered have been excluded. The Revenue Divisional Officer, further reports that four more villages, Kolagal, Janikunta, Hariginadona and Sanjivarayankota of Bellary firka are also affected and deserve a remission of 4 annas in the rupee, which is justifiable according to the outturn statement. These four villages are now included in the list B. Out of the 42 villages affected, the Revenue Divisional Officer, Bellary has inspected 32 villages. The other villages are also similarly circumstanced. He has recommended 4 annas remission in respect of 26 villages and eight annas remission in respect of 16 villages. The amount involved in this proposal comes to Rs. 45414/-. I inspected the crops in a number of villages and agree with the Revenue

Divisional Officer, Bellary. The ryots had to pay the land revenue and loans instalments, which had been suspended for about 17 years, in F 1348, and the loans instalments have been collected with considerable difficulty. This has largely offset the benefit of good crops in Fasli 1348. I, therefore, recommend that remission be granted at the rate of 4 annas in respect of 26 villages mentioned in the list B and 8 annas in respect of 16 villages in the list A.

7. A tracing of the Taluk plan showing the affected villages marked with distinct colours according to different grades of remission recommended in the lists A and B, is enclosed.

8. The whole amount, if ordered, will be given effect to in April 1940 (i.e.,) during the financial year 1940-41.

Assessment - Land Revenue - Fasli 1349 - (Bellary) - Bellary taluk - 42 vges dry assessment - Remission - Proposals.

From the Collrof Bellary No.532/40-A5 dated 26-2-40

Ref. S. 1343 | 40-3. 9 19-4-40.

In his letter read above the Collr. of Bellary has submitted proposals for the remission of dry asst. in 42 villages in the Bellary taluk of the his dt. The Coll has grouped the villages in two groups A and B according to the average out-turn in these villages. Group A consists of 16 villages where the average out-turn of dry crops is repoted to be 4-5 annas and below and group B of villages where the average out-turn is 4-6 annas to 6 annas. The Govt has recommended remission of 50% and 25% of the dry assessment for the villages in groups A and B respectively.

The grouping adopted by the Collr. is not in accordance with the method laid down in B.S.O.14-5-(ii) and B .P.Mis 1699 d/20-6-39. According to the ~~above instructions~~ in the P.P. cited above villages should be grouped separately as the average out-turn in them are (1) below 6 annas but above 4 annas (2) 4 annas and below but above 2 annas and (3) 2 annas and below. For the purposes of remission under B.S.O.14 If the correct grouping is adopted six villages with average out-turn above 4 as placed in group A by the Collr. should be placed in group B and treated as the other villages in that group in the matter of

granting remission.

The Collr. is requested to report why the method prescribed in B.S.O 14-5-(ii) and B.P.Mis 1699 d/20-6-39 for the grouping of villages for the purpose of remission under B.S.O 14 has been deviated from and whther there is any reason for granting a remission of 50% to the six villages ~~wrongly~~ placed by him in group A ahile a remission of only 25% is granted to the villages in group B.

Sir,

Assessment - Land Revenue - Fasli 1349 - Bellary District and Taluk - 42 villages Dry Assessment - Remission proposals - Further report submitted.

ENCLOSURES

Rp 37-38 Cf

Ref:- Board's No. S. 1343/40-3 dated 19-4-40.

SPARE COPIES

Rp 40 Cf

The average out-turn in the ~~xi~~ six villages noted in the margin* is, no doubt, above 4 annas. The average out-turn worked out to one decimal place is noted against each of them. ~~They~~ They were included under group 'A' for the reason that though the average out-turn was above 4 annas it was below 4.5 annas and poorer than that of the surrounding villages. The Revenue Divisional Officer who was asked to report definitely the special reasons for including them under group 'A' reported that the hardships of the ryots in these villages were more acute than in the surrounding villages where the out-turn was above 4.5 annas and that the villages with an out-turn of 4.5 annas and less deserved more concession than the villages with an out-turn of 4.6 annas and above. Except in Kyadigihal where the average out-turn is just 4.5 annas, the average out-turn in the other five villages is just above 4 annas and poorer than in the surrounding villages for which a remission of 4 annas has been recommended. My predecessor, Mr. A.D. Crombie, I.C.S., after inspecting crops in a number of villages, agreed with the Revenue Divisional Officer, Bellary, and recommended the grant of remission of 8 annas in the

annas in the rupee for these six villages also. The recommendation for the grant of the maximum concession of remission of 8 annas in the rupee to the villages with an average out-turn of 4 to 6 annas is in accordance with the discretion vested in the Collector under B.S.O. 14 (5) ii. I, therefore, consider that the remission proposals already submitted do not require any ~~remission~~ revision and request that the Board may be pleased to pass early orders in the matter.

For ~~Collector~~.

Submitted to the Govt.

2/- In the circumstances stated by the Coll. in his two letters read above the Board supports his proposals for the remission of any assessment in 42 villages of the Bellary taluk as follows:-

50% (in the scale of 50% to 75% laid down in B.S.O 14-5-(ii)) to 10 villages with average outturn of 4 annas and below but over two annas

50%. (in the scale of 25% to 50%) to 6 villages with average outturn of over 4 annas but below 6 annas.

25%. (in the scale of 25% to 50%) to 26 villages with average outturn of over 4 annas but below 6 annas.

3/- Of the 42 villages

for which remission is recommended.

No. 25. Singadevanahalli is a Bhatmani village. The Board recommends that remission on the scale proposed by the Collr may be granted to the Govt dry lands in the village on the analogy of the orders in G.O. No. 1930 Revenue dy 1-8-38.

4/- The Board also recommends that the concessions proposed in paragraphs 2 and 3 above may be extended to unobjectionable cases of sivayogama and minor enam lands charged with full assessment or with a quitrent equal to or more than the full assessment.

Abstract

Assessment - Land Revenue - Bellary - Bellary Taluk - 42 villages - Remission of dry assessment - Sanctioned.

Revenue Department

G.O.No.Ms.1564, Dated the 26th June, 1940.

Read the following:--

From the Board of Revenue, Ref.S.No.1343-40-4, dated the 31st May, 1940.

O R D E R.

In view of the adverse seasonal conditions reported, the Government are pleased to accept the recommendations of the Board of Revenue in its reference quoted above and to sanction remission of dry assessment in the following villages of Bellary District and Taluk in the scale noted against them. The remission now sanctioned should also be granted in the villages concerned in unobjectionable cases of sivoijama cultivation and in minor inam lands charged with full assessment or with a quit rent equal to or more than the full assessment.

Assessment - Land Rev. - Fasli 134[illegible] -
Bellary) Bellary taluk - 42 villages
Remission of dry assessment.

S 1923 from the Collr. of Bellary

To A.S.(Sett

The letter from the Collr. of Bellary, at pp 19-22 c.f may be perused.

The Collr has submitted proposals for the remission of 50% of the dry assessment in 16 villages and 25% in 26 villages (including one shrotriem village) of the Bellary taluk of his dt. where the average outturn of dry crops falls below 6 annas ~~viz.~~, less than half the normal yield.

to to The proposal has been examined. It is defective in the following respect

The Collr. has grouped the villages in two groups-A and B. Villages with ~~with~~ outturn of 4-5 annas and below are placed in roup A and those with average outturn of -6 annas to 6 annas are placed in group B. He has recommended remissions at 50% and 25% respectively for the villages in these groups

The grouping adopted does not follow the system laid down in B.S.O.14-5 (ii) and B.P Mis 1699 d/20-6-39. If properly grouped the villages now placed in group with the exception of 6 villages, viz, (1) Yethinabudihal (Rupangudi firka), (2) Sindigeri (Kolur firka) (3) Kyadigihal, (4) Ganikihal (5) Badanahatti and (6) Veni veerapuram (Kurugodu firka) should be placed in one

group being villages with average out-turn of 4 annas and below but above two annas. The excepted villages have an average out-turn of above 4 annas. They should therefore be placed in the higher group viz., group B which consists of villages with average out-turn of above 4 annas and below 6 annas.

If the villages are re-grouped as suggested above, the six villages will get remission (at the same rate as the other villages in group B) only at 25% instead of the 50% recommended by the Collr. It may now be examined whether the villages actually deserve a remissio of 50%. It

A maximum remission of 50% is admissible to all the villages in group B. viz villages with average out-turn of below 6 annas and above 4 annas under B.S.O.14-5 (ii). The point is whether these six villages should be given special treatment while the other villages in group B are given a remission of only 25%. A reference to the map at (H) shows that the six villages are wholly or mostly surrounded by villages for which a remission of 25% or no remission is proposed. There seems to be no justification for granting a remission of 50% to these villages.

The Collr. may be asked to report why the method of grouping laid down in B.S.O.14-5(ii and B.P.Mis 1699 d/20-6-39 has been departed from and whether there is any reason for giving 50% remission to these villages wrongly placed in group A by him.

Draft submitted for orders.

The letter from the Colly of Bellary at pp 19-22 CF may perused

List of papers putup vide - p1 N.F

the Colly has submitted proposals for the grant of Govt

ans from 25% to 50% in 42 villages in the Bellary taluk of his dt where both mungari and hingam crops failed in fasli 1349 due to unfavourable seasonal conditions

para 2 + pp 19-20

The Colly reports that the sowing of the mungam crops was belated on account of the late receipt of rain and that want of rain from the middle of August to the middle of September 1939 affected these late sown crops. The rains received in October did not improve their condition sufficiently

Full Statt at p3 cf.

& also for week. The unfavourable dry winds and want of dew combined with agricultural pests is reported to have caused the deterioration of these crops. para 3, p 20 cf.

There was no rain in the two rain recording stations in the taluk viz Belkany and Kurugodu in December 1939 or January, February and March 1940. There was thus no chance for the crops to revive. The outturn as seen from the season reports was poor. p 2 cf

The taluk is liable to frequent drought. Relief by way of suspension or remission of land revenue was afforded in as many as six years in the last decade in the taluk. Full remission of dry assessment was granted in Fasli 1347 to all the villages for which remission is now proposed while most of them were given relief by way of suspension or remission of land revenue in fasli 1346 as well. Fasli 1348 was normal. A statistical statement at (M) para 3, p 2 cf and the map at (Y) p 2 cf (L) map at (Y)

A good crop was harvested. The suspended loans instalments of about 17 years are, however, reported to have been collected from the ryots of that fasli. This has largely offset the benefit of the good crops harvested in fasli 1348.

After inspecting the crops in a number affected of the villages and satisfying himself as to the need for relief the Coll^r (Mr A.D. Crombie) has recommended remission of dry assessment in 42 villages on the following scale.

with average outturn of 4 annas and less 50%.

with average outturn above 4 annas but below 6 annas 25%

The grouping of villages adopted by the Coll^r in not according to the method laid down in B.S. 014.5(ii) or in B.P. Dis 16919 & 20.6.38

p35 of B S & V.C I
Bk-68

(5)

p22 cf

[It is not quite clear that instalments were collected all round. This seems unlikely. What is probably meant is that the ryots paid a year's instalment on loans – a thing they had not done for 17 years. – also they felt it Rel]

For the purposes of day remission the villages are to be grouped as the outturns in them are (I) above 4annas and below 6annas, (II) 4annas and below but over 2annas and (III) 2annas and below. If proper grouping of the villages is adopted, the proposals will be as follows:-

10 villages with average outturn of 4annas and below but over 2annas — 50% (in the scale 50% to 75% laid down in R.S.O. 14-

6 villages with average outturn of over 4annas but below 6annas. — 50%. (in the scale 25%

~~26~~ 26 villages do. — 25%. — do —

The proposals thus results in the maximum remission of 50% allowable under R.S.O 14-5 (ii) being granted to 6 villages (Yethinahudihal Sindigeri, Kyadigihal, Gentikihal Badanahatti and Veni-Veerapuram) with average outturns of above 4annas and below 6annas, while the minimum 25% alone is proposed to be granted to the 26 other villages — ¶ 35 of B.S.O vol I Book 68

Start at ¶ 23 (f)

Stands at p 25 of villages with similar outturn.

A reference to the map at (H) shows these six villages are wholly or mostly surrounded by villages for which either 25% or no remission has been proposed by the Colr. The Colr was therefore asked to justify the proposal for a differential treatment in the case of these villages. The Colr's reply is at pp 39-40 of. He sticks to the original proposal on the grounds that the hardships of the ryots in these six villages are more acute than in the surrounding villages and that the recommendation for the grant of the maximum remission of 8 annas in the rupee to the villages with an average outturn of 4 to 6 annas is in accordance with the discretion vested in the

Case under Rule 16.5(ii) | p 35 of B.S. Vol I Rk-68

The Case records satisfied as to the necessity of granting 50% remission to these six villages

One shotnem village is included in the 42 villages for which remission is proposed. The Govt have, on previous occasions granted remission on Govt lands in protecting villages. Please see the G.O. at p 5 c of (E) and para 5 of the G.O. at p 1 c of (L).

"Singadevanahalli" at p 25 c

The precedent may be followed.
Memo B.P. No. 2129/4.8.38 (E)
G.O. No. 1389 Rev dt 30.5.38 (L)

The point for consideration is whether the DC should recommend the proposals for remission

The average outturn of dry crops in the taluk and the crop history of the tract with the special circumstance that the good harvest the ryots had in fasli 1348 was spent up in paying suspended loans instalments would seem to justify the proposals.

Statt at p 27 c

For orders which the
record would recommend
the proposals to the
Chief Secretary are not
stated whether the proposed
concessions should be
extended to cases mentioned
in paragraph 6 of B.S. 014
viz. :- analogue honorable cases
of Sivagiyama and minor
inam lands charged

with a quitrent equal
to or more than the full
assessment if the Board
is inclined to support
the Collr's proposals it
may also be recommended
that the remissions granted
to other dry lands may
be granted to cases mentioned
in B.S. 014-6.

scale (25-50) is 25% but the Cttee has recommended the maximum 50%. The reason given for the differential treatment, viz, that accg to the R.D.O the people of these 6 villages are put to greater hardship than those of other village is not acceptable. The scale of remissions has been laid down accg to the out-turn of the crops and such hardships as cannot be estimated in terms of crop out-turn cannot be taken into account in applying the scale. So long as there is nothing to doubt the accuracy of the figures of out-turn, the remission to be given must be regulated strictly accg to those figures. The 6 villages may be considered in the same category as the 26 villages which have secured an out-turn of over 4 annas and below 6 annas. The Cttee has recommended 25% remission for the latter villages, being the minimum in the scale allowable. The same rate of remission (25%) may be recommended for the 6 villages against 50% recommended by the Cttee. Subject to this modification, the Cttee's proposals may be supported

This seems to me too rigid. The local officers, even after their attention has been drawn to the matter, wish that these villages (even though the average outturn slightly exceeds 4 annas yield) ought to receive more favourable treatment than the 26 other where the average outturn exceeds 4 annas by a larger margin. I think the Board may approve the Cttee's proposal in this case and recommend it to Govt.

1-2

I agree with C^{TC} in think he may accept the Collector's proposal In matters of this kind it is impossible to disagree with the man on the spot, & we may take it that in spite of the Board's outturn, the 6 villages are in need of greater concessions than the rest.

Explanation of clerk Sri. Seshadri

With reference to the Commr's query at p. 47 of B&R No. 1774 Mis. 2.7.40 I beg to submit as follows.

The Collr's first letter at pp 1-2 of applyn for sanction to postpone the Fcly Kist to March in certain villages in the Bellary taluk was disposed of in the Bds Office at p of the B&P which a detailed report was called for from the Collr The detailed report from the Collr dated 26.2.40 and received in the Office on 2.3.40 was actually received in the section on 4.3.'40 ~~It was~~ Unfortunately it was kept in an ordinary pad and as there were other papers to be attended to this ~~was~~ was not attended to earlier I fell ill during the Easter Holidays came and I ~~subsequently I fell ill and was~~ had from 27.3.40 to go on leave regret very much for the omission. I beg to be excused

It is true that the clerk fell ill and had to take leave

Explanation of clerk Narayanan Nambissan

I took charge of the Seat on 12th April and put up a note and draft reference to the Collr the 18th The Collectors reply dd 27.4.40 was received

on 1-5-40. After examining the papers which had to be carefully done I put up a detailed note on 14-5. Forenoons having two other urgent commission papers relating to the Tinnevelly district there were large arrears in the seat to be cleared up. The file was in circulation from 14.5.40 to 28.5.40. The draft to the Govt was put up on 30.5.40. It is submitted that there was thus no avoidable delay on my part.

29.7.40.

Submitted

31/7 As clerk Sri Seshadri fell ill, his papers accumulated. No relief could be given for want of experienced clerks. His delay in a few cases during this period was already noticed and he has been punished by stoppage of increment for 3 months.
